

Are We Being Invaded?

Presentation and workshop on Aquatic Invasive Species

What are they?
How do they enter our waters?
What impacts can we expect with port & coastal development?

PLACE:

Haida Heritage Centre
at Kaay Lnagaay,
Classroom 1,
Skidegate

DATE:

Tuesday,
August 14, 2007

TIME:

12 noon to 2 pm

Photos:

European Green Crabs (*top left offset*) compete with native crabs.

Japanese Oyster Drills (*top left above*) will bore holes into young oysters & feed on them.

Tunicates (*top right above*) can out-compete & suffocate mussels — they are a major problem for shellfish aquaculture industries.

Cruise Ship & Freighter (*bottom photos above*) in Prince Rupert harbour, one of many pathways Aquatic Invasive Species enter our waters.

Shellfish & Marine Plant Biologist , Debbie Paltzat, of the BC Ministry of Agriculture and Lands, will be presenting in Skidegate, Haida Gwaii.
